

# RISO CV3030

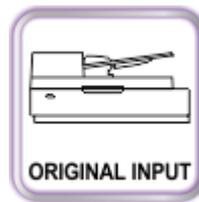

Print Speed: 130ppm

Print Area: A4

D600DPI

10 Sheet ADF

USB Flash Drive/PC

8 Standard Color

**SPEED, VERSATILITY AND HIGH QUALITY:**

## ***High-End Features @ Budget Price***

### **High-speed printing of 130 ppm**

The CV series provides high-speed printing of up to 130 ppm which means you can print 500 pages in just less than 4 minutes.

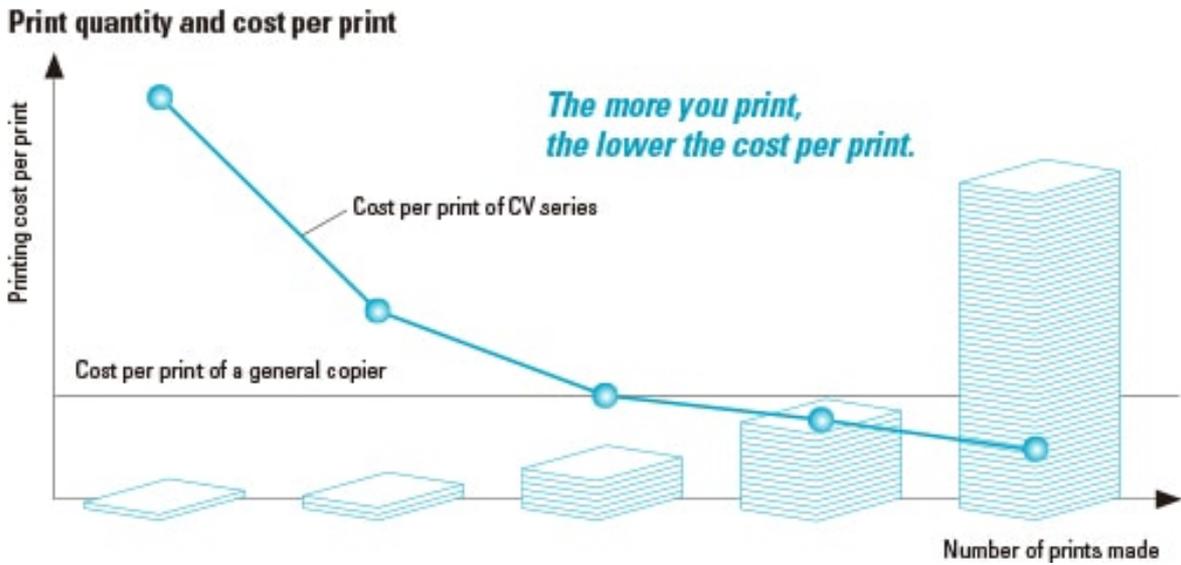

### **Excellent Print Quality**

High-quality printing is achieved by using a higher-resolution thermal head which is normally employed in higher models. The new light source delivers improved color reproductibility & also the tonality and resolution have been improved, thanks to the enhanced error-diffusion processing.

### Savings in print costs

The CV series makes prints from a master. As a result, the more pages generated from each master the lower the cost per print, making it highly economical for medium to high volume printing.

## High Paper Capacity

The paper trays have a capacity of approx. 1000 sheets for feeding and approx. 800 sheets for receiving, which ensures uninterrupted printing over a longer period.

Note: The paper capacity depends on paper type.

## Direct printing with Pendrive

You can print directly from the data saved in a USB flash drive. This is convenient when the machine is not connected to a PC or network. Also, printing directly from Computer ensures better printing quality.

## **Easy access to the print drum**

Changing ink color is simple yet effective to emphasize the original. The design allows quick and easy removal and replacement of the print drum. This helps minimize interruption at busy times.

## **Auto Document Feeder (ADF)**

Automatic Document Feed allows you to load up to 10 sheets for scanning & printing, hence allowing you to do other jobs while machine does the printing

Note: The paper capacity depends on paper type.

## **Easy-to-operate LCD panel**

The 128 x 64 dot LCD panel is clearer to view and easier to operate than ever before.

## Compact & Ergonomic Design

### Intuitive operation

The new operation panel is designed for intuitive operation, making it user-friendly.

The left-to-right keyboard layout provides fluent operation; for initial setting, master-making and printing.

### Compact

New design, smooth lines and a compact body result in reduced size and bulk, to fit in even a limited space.
