# RISO CV3130

Print Speed: 130ppm

Print Area: LEGAL

D600DPI

10 Sheet ADF

USB Flash Drive / PC

Interface

8 Standard Color Optio

SPEED, VERSATILITY AND HIGH QUALITY:

High-End Features @Budget Price

High-speed printing of 130 ppm

The CV series provides high-speed printing of up to130 ppm which means 500 pages in less than 4 minutes.

Time required to print 500 pages
General B&W Photocopiers/Laser Printers — 13 minutes
CV 3130 — 4 minutes

Excellent Print Quality

High-quality printing is achieved by using a higher-resolution thermal head which is normally employed in higher models. The new light source delivers improved color reproducibility of Red

and Bright Red. Also the tonality and resolution have been improved at the highlight range thanks to the enhanced error-diffusion processing.

300 dpi x 300 dpi   300 dpi x 600 dpi

High Paper Capacity

The paper trays have a capacity of approx. 1000 sheets for feeding and approx. 800 sheets for receiving, which ensures uninterrupted printing over a longer period.

Note: The paper capacity depends on paper type.

Easy-to-operate LCD panel

The 128 x 64 dot LCD panel is clearer to view and easier to operate than ever before.

Direct printing with Pendrive

You can print directly from the data saved in a USB flash drive. This is convenient when the machine is not connected to a PC or network. Also, printing directly from original data ensures better printing quality.

Easy access to the print drum

Changing ink color is simple yet effective to emphasize the original. The design allows quick and easy removal and replacement of the print drum. This helps minimize interruption at busy times.

Compact & Ergonomic Design

Intuitive operation

The new operation panel is designed for
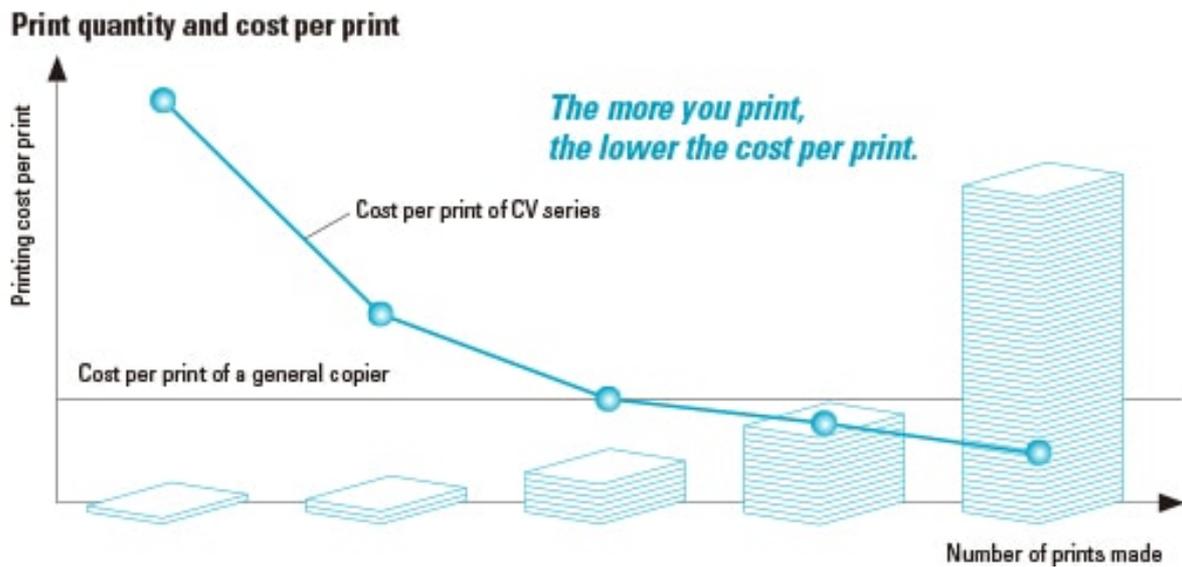

intuitive operation, making it user-friendly.

The left-to-right keyboard layout provides

fluent operation; for initial setting, master-making and printing.

Compact

New design, smooth lines and a compact body result in reduced size and bulk, to fit in even a limited space.

Savings in print costs

The CV series makes prints from a master. As a result, the more pages generated from each master the lower the cost per print, making it highly economical for medium to high volume printing.

Print quantity and cost per print

The more you print, the lower the cost per print.

Cost per print of CV series

Cost per print of a general copier

Printing cost per print

Number of prints made

Auto Document Feeder (ADF)

Instead of feeding sheets individually, the ADF enables approx. 10 sheets to be fed automatically.

Note: The paper capacity depends on paper type.
