**Make your *Ideas* stand out.**

**Communicate with more clarity.**

Double your colours for double the impact and immediacy in your documents. ME series printers provide the power of two-colour printing at just a single pass, making it easy and convenient to give your documents a professionally finished look. RISO quality lets you communicate your ideas quickly, beautifully, easily, and usefully. And the highly durable ME series take various type of paper, making them more versatile than ever.

### **Single Pass Dual Color Printing**

The RISO ME6350 digital duplicator comes with dual drums. Compared to using single-colour digital duplicators for two-colour output, this reduces ink-drying time and the tasks of reinserting paper and changing drums. One simple action gives you the high-speed colour printing you need. (Single-colour printing using one drum is also possible.)

### Single-colour digital duplicator

### The RISO ME6350

## High Speed Printing @ 150ppm

The RISO ME6350 features an adjustable five-speed function for printing between 60 and 120 pages per minute. It also has a high-speed mode that prints at a maximum speed of 150 pages per minute, or approximately 750 pages in five minutes.

Note: Comparison of the RISO ME9350 (150 pages per minute) and a standard printer (30 A4-size pages per minute).

## High Quality

**Sharp, rich images give your ideas the desired impact on the page**

The RISO ME6350 digital duplicator both scans and prints information at a high resolution level of 600 dpi, producing sharp, clear images of even fine lines and small characters. The model uses the RISO Master E Type HG, with a two-layer ink-permeable sheet adding an extra fine-filter layer to the standard layer, enabling even ink transfer to the paper. It can also

reproduce subtle colour gradations, enabling users to print clear copies of photos, shaded areas of images, and documents written in pencil.

**Photo mode: Portrait**

**Photo mode: Group**

**Pencil mode**

## **Overwhelmingly Economical Print Costs**

The RISO ME6350 first creates a master copy of the original document, from which prints are made. The printing cost per copy of a document goes down with every print, making the RISO ME6350 highly economical for large-volume printing. You can use the optional “A4/letter drum” to print these popular sizes even more efficiently to save master usage, holding down running costs to a minimum.

## Numerous Input Options

For users who create originals on a PC, the printer driver software automatically handles colour separation when the data is sent to the printer. Even if the printer is not connected to your PC or network, you can still print directly from your data file. Just save the file to a USB flash drive, connect the flash drive to the printer via the built-in USB port, and you're ready to print. And of course you can print from copies scanned directly into the unit.

### Various Color Options

The machine's colour drum accommodates a wide variety of inks in 21 standard colours, 50 custom colours, plus special order-made colours that can give corporate logos an extra-special look. This huge selection of colours lets you add powerful impact to your documents. And because the ink is made by RISO, you're assured of the highest quality results. Front panel access makes switching the drum quick and easy to change colour, too.

Red	Bright Red	RISO-Marine Red	Burgundy	
Brown	Yellow	Green	Teal	
Blue	Medium Blue	RISO-Fed. Blue	Purple	
Flat Gold	Orange	Crimson	Hunter Green	
Gray	Light Gray	Fluorescent Pink	Fluores. Orange	Gold

[Custom colours]

Note: The actual colours may differ from the samples shown above.

### Simple and Reliable Security Features

By registering the names and PIN codes of authorised users, access can be restricted and misuse prevented. Instead of a PIN code, a USB flash drive\*1 can also be used for authentication and registration.\*2 The Protect function displays a message asking the user to transfer the master to the Master Disposal Box after printing is completed. For additional security, it is also possible to use a padlock to secure the Master Disposal Box.\*3

1 Please contact a RISO sales executive for the kinds of USB flash drives that may be used.

\*2 Either a PIN code or a USB flash drive can be selected as the authentication method.

\*3 A padlock is not provided with the main unit. Please use a commercially available padlock.

## **Caring for the Environment**

### **Recycled parts**

Ink bottles and some parts for the ME series are made partially from recycled components.

### **ENERGY STAR® Program**

Compliant with an international program that promotes energy saving in printing machines.

### **RoHS Directive**

Compliant with the European Union directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

### **RISO Ink is made of eco-friendly soy oil**

One of the ingredients of RISO INK is soy oil, making it a high-quality, eco-friendly product. It meets the soy oil content standards specified by the American Soybean Association and is certified to use the "CONTAINS SOYOIL" trademark.

### Versatile printing on different paper types.

The RISO ME6350 lets you use a wide range of paper types, giving you the perfect option for your job every time. Advertising fliers and leaflets, announcements, newsletters, tickets, business applications such as letterheads, reports and business cards, lesson materials, invitations, coupons; the list just goes on and on. If you can print it, it's sure to look better with a second colour.
