Accelerate your tasks.

Put the power of 185 ppm printing to work for you.

High Speed Printing @ 185 ppm

In addition to an adjustable five-speed function for printing between 60 and 130 pages per minute, the RISO SE9380 digital duplicator has a high-speed mode that prints at a maximum speed of 185 pages per minute, the fastest in the industry, or approx. 925 pages in five minutes. A variety of documents, including meeting handouts and marketing and promotional material, can be printed in a speedy and efficient manner regardless of the required paper size.

Note: Comparison of the RISO SE9380 (185 pages per minute) and RISO EZ 5 Series (130 pages per minute) digital duplicators with monochrome photocopiers (A4 size, 40 pages per minute) and monochrome laser printers (A4 size, 20 pages per minute).

Overwhelmingly Economical Print Costs

The RISO SE9380 first creates a master copy of the original document, from which prints are made. The printing cost per copy of a document goes down with every print, making the RISO SE9380 highly economical for large-volume printing. You can use the optional “A4/letter drum” to print these popular sizes even more efficiently to save master usage, holding down running costs to a minimum.

High Quality

The RISO SE9380 digital duplicator both scans and prints information at a high resolution level of 600 dpi, producing sharp, clear images of even fine lines and small characters. The model uses the RISO Master E Type HG, with a two-layer ink-permeable sheet adding an extra fine-filter layer to the standard layer, enabling even ink transfer to the paper. It can also reproduce subtle colour gradations, enabling users to print clear copies of photos, shaded areas of images, and

documents written in pencil.

Numerous Input Options

The RISO SE9380 digital duplicator can be connected to a network, so original data and settings can be sent from a remote PC. Even if the printer is not connected to your PC or network, you can still print directly from your data file. Just save the file to a USB flash drive, connect the flash drive to the printer via the built-in USB port, and you're ready to print. And of course you can print from copies scanned directly into the unit.

Various Color Options

The machine’s colour drum accommodates a wide variety of inks in 21 standard colours, 50 custom colours, plus special order-made colours that can give corporate logos an extra-special look. This huge selection of colours lets you add powerful impact to your documents. And because the ink is made by RISO, you’re assured of the highest quality results. Front panel access makes switching the drum quick and easy to change colour, too.

Red	Bright Red	RISO-Marine Red	Burgundy
