

THE COMCOLOR FW5231 SOLUTION

Up to 120 pages / minute

A4 / A3 formats

1 side bin (1000 sheets)

Inkjet printers require no heat when printing unlike laser printers. The ComColor FW5231 boasts ultra-fast print speed combined with a fast first print time to streamline printing, helping make busy work environments more efficient. Its ultimately low power consumption prevents paper from curling to reduce paper jams. And because output requires no cooling, pages can be sent immediately after printing to any of your optional finishers, vastly reducing production times.

Get more autonomy: With this printing solution, you no longer need to clutter your premises by storing hundreds of pre-printed documents!

Control your costs: do not deprive yourself of the impact of color for budgetary reasons. Get an extremely competitive color copy cost!

Make printing easy: The ComColor FW5231's color and tilt touch screen interface is designed for maximum convenience.

Manage and control printer usage: up to 1000 different users can be registered, each with a unique passcode.

The features and simplicity of a copier

The ComColor FW5231 has a touch screen with intuitive controls. You quickly access the functions of your choice. No technical skills are needed, the solution is very easy to use.

The computer environment of a printer

The installation of a driver is enough to control your color printer remotely from your computer . The ComColor FW5231 can also be connected to an internal network to easily manage your print fleet.

The Reliability and Speed of Offset

While high-speed printing and reliability are often associated with offset printing, RISO's FORCEJET technology also meets these criteria. You manage your production peaks without stress.
